Q.3: The sun arises two hours before Arunachal Pradesh compared to Gujarat in the West, but watches show at the same time. How will happen? Ans: From Gujarat to Arunachal Pradesh there is a two-hour time delay, but watches show the same time because the weather along the standard Meridian of India (82 0 30  $\hat{A}$   $\hat{e}$ ) passing through Mirzapur in Uttar Pradesh is taken as the standard time for the whole country. Since the same standard time for the whole country has been adopted, the watches show at the same time in Arunachal Pradesh and Gujarat and in all parts of the country. Q.4: The central location of India at the Indian Ocean's head is considered of great meaning. Why? ANS: Indian Landmass has a central location between East Asia and West. India is an extension south of the Asian continent. Indian oceanic trans routes that connect Europe countries to the West to Asia Asia countries provide a strategic central location in India. The Peninsula Decan protruding in the Indian ocean, thus helping India to establish close contact with Western Asia, Africa and Europe from the west coast and from south-east and eastern Asia from the east coast. No other country has a long coast on the Indian Ocean as India. Thus, the eminent position of India in the Indian Ocean justifies the denomination of an ocean after it.
