Volume of Triangular Prisms

A triangular prism has bases that are triangles as shown below. The height of a triangular prism is the distance between the triangles. In the figure below the height is 10 cm. In order to calculate the value of "B" (area of the base) you need the value of the base and the height of the triangle. In the figure below the triangle is a right triangle with a base of 6 cm and a height of 8 cm.

Step 1: find the area of the Base (a triangle)

Area of Base "B" = $\frac{bh}{2}$

"B" = $\frac{(6)(8)}{2}$

"B" = 24 sq. cm.

Step 2: find the volume of the triangular prism

V = Bh

V = (24)(10)

V = 240 in.³

What is the volume of the trapezoidal prism?

Write an expression for the volume.

Literacy

The printer is on the back. Fill in the blanks and also place capital letters and punctuation into the appropriate places so the paragraph makes sense.

To find the volume of a triangular prism you first need to find the cross sectional _____ to do this you use the formula _____ base _____ height to then find the volume of a _____ prism you the CSA by the _____

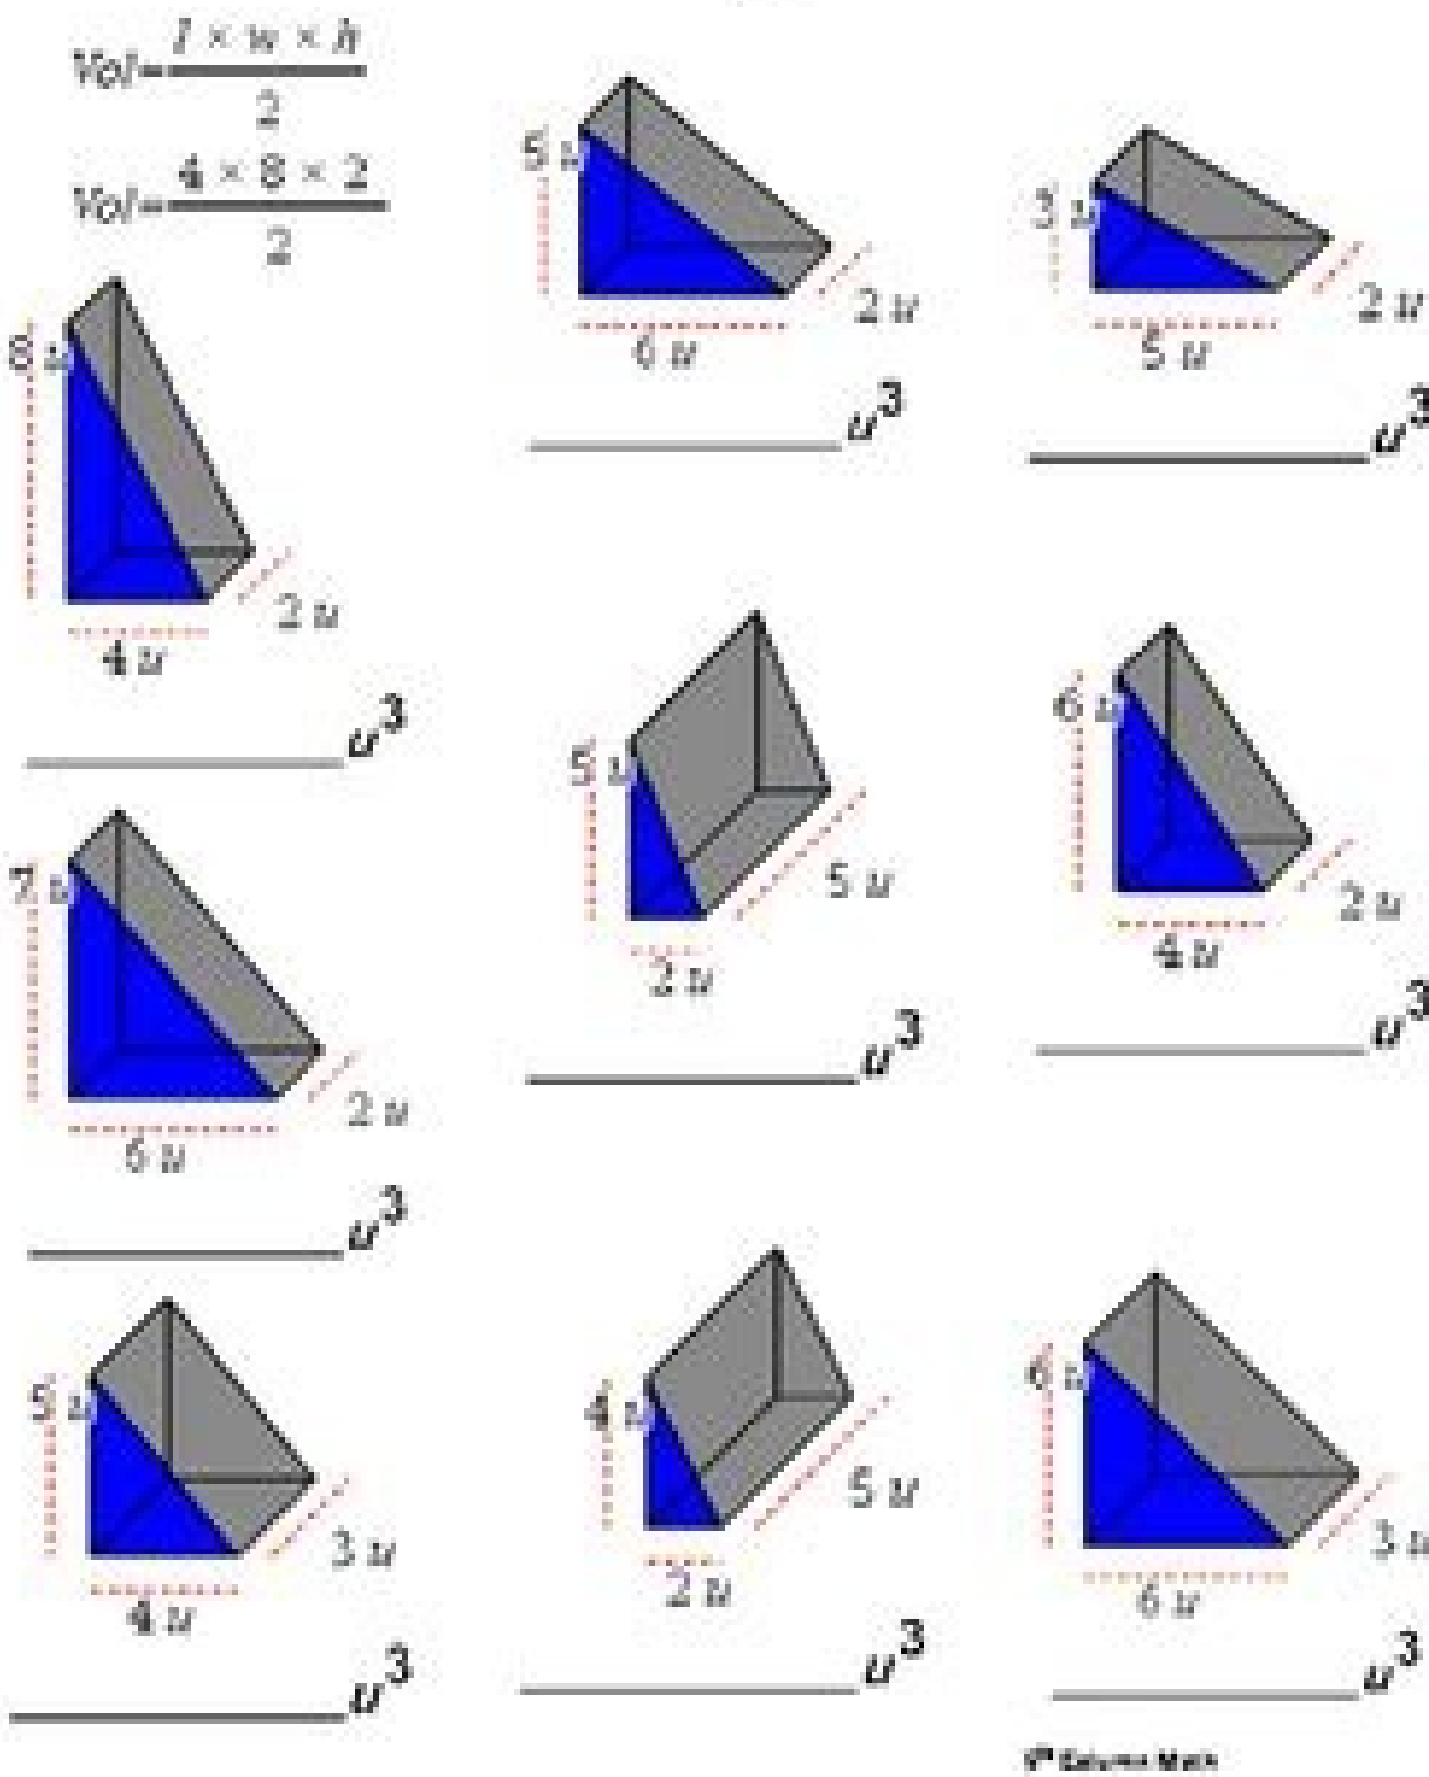

Skill 1

Find the volume of these shapes.

Skill 2

Find the missing lengths.
