Linear guideways india

Hiwin linear guideways india. Linear guideways manufacturers india. Linear guideways price in india.

Compared to a traditional slide, the coefficient of friction for a linear guide way is only 1/50th. Therefore, there would be no slippage while the load is moving.(2) Long life with high motion accuracy With a traditional slide, errors in accuracy are caused by the counter flow of the oil film. Moreover, these are being offered with customized solutions to ensure complete client's satisfaction.Our exclusive range of products includes Linear Cross Roller Bearing (Type R), Linear Cross Roller Bearing (Type RD), Linear Needle Roller Bearing (L/M), Linear Needle Roller Bearing (N/O), Frictionless Tables Type-RO, Frictionless Tables Type-NU, Frictionless Tables Type-NL, Coordinate Frictionless Tables Type-NB, Coordinate Frictionless Tables Type-RQ, Guide Rails, Guide Blocks, Precision Rolled Ball Screw & Support Units, Precision Ground Ball Screw, Shaft End Supports, Ball Screw Support Units, Flat Thread Rolling Dies For Self Tapping Screw etc. Conventional linear slides can only take small loads in the direction parallel to the contact surface. H H Engineering Gujarat Linear Guideways Regal Techno Enterprises College Road, Nashik Product Price :Get Latest PriceProduct Details:Packaging TypeBoxBrandHIWIN,THK,PMI,AMT,NSK,INA,IKOUUsage/ApplicationIndustrialSize10-400mmDesignStandardI Deal InNew OnlyLinear Guides that we provide to our clients are self-aligning, high load capacity ball guides offer interchangeable parts and are ideal for any factory automation application. for high precision grades consider ordering a matched, non-interchangeable, assembly of a block and rail Based in Panchkula, we are thriving on our qualitative range of Linear Bearings, Linear Motion Slides, Frictionless Tables, Co-ordinate Frictionless Tables & Flat Thread Rolling Dies. With a linear motion guideway, grease can be easily supplied through the grease nipple on the linear guide way block. Grinding or milling the machine surface, following a recommended installation procedure, and tightening the bolts to their specified torque can achieve highly accurate linear motion. These are being used where smooth, exact, error-free and playfree linear motion is required. Also, it can be quite difficult to supply sufficient lubrication to the contact surfaces because finding an appropriate lubrication point is not very easy. Service temperature under 150 Deg C, and instance temperature can up to 200 Deg.I Series (Intelligent Linear Guidway)- Integrating the linear Guidway with magnetic encoder in one unit - High Stiffness from linear guidway and high precision from magnetic encoder- Sensor and magnetic strip inside to prevent damage from external material - Non- Contact magnetic sensor ; long life Insufficient lubrication causes wear between the contact surfaces, which become increasingly inaccurate. (6) Easy lubricationWith a traditional sliding system, insufficient lubrication causes wear on the contact surfaces. Our range is being widely used in the field of anti friction guide ways. 900 / Piece(s) Get Latest Price (1) High positional accuracyWhen a load is driven by a linear motion guide way, the frictional contact between the load and the bed is rolling contact. Because of the restraint effect between the rails and the blocks, linear guide ways can take up loads in both the up/down and the left/right directions. These are being widely appreciated for high quality standards by various reputed companies like HMT, MICO, PMT, TELCO and other scientific institutions. This is especially true for the reciprocating parts.(4) Equal loading capacity in all directions With this special design, these linear guide ways can take loads in either the vertical or horizontal directions. This results in greater power savings, especially in the moving parts of a system. The coefficient of friction is only 1/50th of traditional contact, and the difference between the dynamic and the static coefficient of friction is small. 850 / Piece(s) Get Latest Price A linear guide way allows a type of linear motion that utilizes rolling balls. - Identical load in four direction (up/down/right/left),self-aligning to absorb installation-error, high stiffness, high precision - Self - aligning capability to absorb installation- error, suitable for the High-speed automatic machines.MG Series (Miniature Linear Guide way)- MGN Series : Anti -corrosion ability, compact size- MGW Series : Anti -corrosion ability, Wide rail, Miniature size ,High stiffness against moment loadQ1 Series (Quiet Linear Guide way with Ball Chain Technology)- Low noise design, smooth movement, quieter operation, steady lubrication and long service life.RG Series (High Rigidity Roller type linear guide way)- The Rolling element of steel ball substituted by the roller, designed for realizing the super-high rigidity and the high load ability.Metallic End Cap Type Linear Guide ways-Well temperature resistant ability. They are also more likely to become inaccurate when they are subjected to these loads.(5) Easy installation Installing a linear guideway is fairly easy. Prominent & Leading Manufacturer from Chennai, we offer hiwin linear guide ways and hiwin. In contrast, rolling contact has little wear; therefore, machines can achieve a long life with highly accurate motion.(3) High speed motion is possible with a low driving force Because linear guideways have little friction resistance, only a small driving force is needed to move a load. It is also possible to utilize a centralized oil lubrication system by piping the lubrication oil to the piping joint.(7) Inter changeability Compared with traditional box ways or v-groove slides, linear guideways can be easily replaced should any damage occur. We manufacture these by using advanced technology and sophisticated machines in our huge manufacturing unit. Hiwin Linear Guide Ways Get Best Quote Approx. With these features, linear guide ways can Get Best Quote Approx. By using circulating balls between the rail and the block, a linear guide way can achieve high precision linear motion.
