But what is the best time tracking app for Android? Let's find out! In this article, we take a look at the top ten time tracking apps for Android and discuss their features, prices, and user reviews. This article contains: (Click the links below to go to a specific section) Let's dive right in. Top 10 Time Tracking Apps for Android There are many time tracking apps for Android. However, the best apps can do much more than just track time. Your added features and abilities will help you focus better, increase productivity, and build good habits. Here are some basic features your Android time tracking app should have: Simple time tracking: Since employees access this feature on their phones, the app needs to provide structured, user-friendly access to the most basic functions. Clear timesheets: A detailed timesheet with information on productivity and project deadlines helps you to better manage the working hours and workflow of your employees. Comprehensive Reports: An advanced time tracking application typically provides reports that allow you to analyze employee productivity and accurately estimate project deadlines. Data Export: Apps that let you export timesheet data help you create accurate invoices with details like billable hours and employee pay ratesCustomers. Keeping these features in mind, here are the best time tracking apps for Android: 1. Time Doctor Time Doctor is a trusted time tracking and productivity management app used by various companies like Verizon and Thrive Market. Mobile time tracking for Android devices is useful for businesses of all sizes. The application is intuitive, which makes it very easy to track employees' time. The app tracks important data while protecting employee privacy. It enables organizations to make data-driven decisions and provides employees and teams with the information to improve productivity and efficiency. A. Key Features Flexible Time Tracking. Track employee hours and productivity for every client, project, and job in real time. permanent shift workers. And if employees forget to count down the time, they can change their working hours from the application dashboard. Detailed Reports: Time Doctor provides detailed reports on time usage and performance metrics. The Total Uptime report provides an overview of the time logged in the mobile app during the day, week, or a specific time period. You can export and download Time Doctor reports in CSV, PDF or XLS (Excel or Google Sheets) formats. Synchronization of time data between devices: Working times recorded in the mobile application are automatically synchronized with the desktop application. This allows employees to track work across multiple devices. Note. It is not possible to record working times in the Time Doctor mobile and desktop apps for the same company account at the same time. To avoid reporting inaccuracies, employees must close one application before starting a timesheet in another. And since the Time Doctor mobile app works hand-in-hand with the desktop app, you can use all the features of the desktop app. The desktop app offers additional features like payroll, downtime tracking, distraction alerts, task and project management, no limitsand a wider range of reports that include attendance tracking. It also allows you to integrate apps with Chrome extensions for increased productivity. Available integrations include Freshbooks for invoicing, Asana and Trello for project management, Slack for communication and PayPal for payments. B. How to install and use Time Doctor for Android To install Time Doctor on Android smartphones, follow these steps: Step 1: Search for Time Doctor 2 in Google Play Store and click "Install" Step 2: Run the app and log in. using your Time Doctor credentials Step 3: After logging in, you will see your assigned tasks and projects. Click on a task to start tracking its time. Note. Once you start tracking task time, the app will ask you how much time you want to track for that task. But it is optional. Learn more about Time Doctor's features here. C. Pricing Time Doctor offers a free 14-day trial of its product without asking for credit card details.
