Did not find what you were looking for? Ask a question 8 years ago Big Thanks !!! 8 years ago Thank you so much! He continues to make them come. 7 years ago OMG. Thank you so much for the complete thing. I really appreciate you !!! 7 years ago Thank you, these answers are surely correct 6 years ago Updated: 6 years ago, mayapayapa thank you!! I hope this helps someone out! Week 5 Quiz endocrine and lymphatic system Systems Part 1 of 6 - A 2.40 / 24.0 Points Question 1 32A 3.0 / 3.0 Points Which of the following hormone is released in response to an impulse nervous? A A AA glucagon B cortisolo C epinephrine D testosterone E A A A A insulin Feedback : Good job question 2 32A A 3.0 / 3.0 Points Glucocorticoids are steroid hormones produced by A A Adrenal gland B testis A C thyroid gland A A A D hypothalamus A E ovaries Feedback : Good job question 3 32A A 3.0 / 3.0 Points All of the following are endocrine glands except A pituitary gland A A B pineal gland A C parathyroid gland A D adrenal gland A E thymus Feedback : Good work question 4 32A A 3.0 / 3.0 Points The release from the anterior pituitary gland of growth hormone is increased by decreased glucose levels in OOD D Increased ACTH release from the anterior pituitary Gland A A potassium plasma E increased concentration Feedback : Good work question 5 32A A 3.0 / 3.0 Points Hormone secreted by the anterior pituitary gland that causes darkening of the skin A A GH A H A A B LH A C ACTH A A A A D FSH A E MSH Feedback : Good job application 32A 6 3.0 / 3.0 Points Melatonin is a hormone released by A A A pineal gland B adrenal gland A C pituitary gland A D A A A D thymus gland A E pancreas Feedback : Good work question 7 of the 32nd A 3.0 / 3.0 Points An organ that can be classified as both endocrine and exocrine gland is the A A thymus gland A A A A B pancreas A C hypothalamus A D gallbladder A E pituitary gland Feedback : Good work question 8 32A A 3.0 / 3.0 Points The hormone released in response to low levels of calcium in the blood is A A It A thyroxine A B oxytocin A A C parathyroid hormone A D growth hormone A E calcitonin Feedback : Good job Part 2 of 6 - A A 18.0 / 21.0 Points Question 32A A 3.0 / 3.0 Points Which of the following usually carry the functions of the spleen after splenectomy A A A A thymus B red bone marrow and blood red marrow C liver A A A D lymph nodes E liver Feedback : Good job application 10 32A A 3.0 / 3.0 Points Edema may be a result of A A It A infected lymph node A B It B blocked a lymphatic vessel A blood A C Increased pressure A D A B and C are correct Feedback : Good work question 11 32A 3.0 / 3.0 Points All the following vitamins are transported by the lymphatic system except A A vitamin K B vitamin D A C vitamin E A D vitamin A feedback : Good job application 12 32A 3.0 / 3.0 Points The first line of defense against pathogens innates Innate protection of antibodies A A phagocytosis A C inflammation A D intact skin and mucous membranes A E complement Feedback : Good work question 13 32A 3.0 / 3.0 Points Epstein-Barr Point The cause A A leukemia A B delayed usual reactions A C HIV A infectious mononucleosis A D acute lymphocytic leukemia A E chronic lymphocytic leukemia Feedback : Good work question 14 32A 3.0 / 3.0 Points Which of the following is considered a chemical factor in the forearm of innate A A A interferons A B Transferrins A A A A c flow of urine A d mucous membranes A e gastric juice Feedback : Please review chapter 3 part 17 part 6 A A A 21.0 / 21.0 Point Question 16 of 32A A 3.0 / 3.0 Points Which of the following processes are involved in carbohydrate catabolism? Transport A A A glycolysis B electron chain cycle A C Krebs A D all of these processes are part of carbohydrates catabolism Feedback : Good job QUESTION 17 of 32A A 3.0 / 3.0 Points All of the following result in an increase in body temperature Except A A A shivering A B Vasodilation of blood vessels in the skin A A A C epinephrine release A D release of thyroid hotones A e physical exercise Feedback : good job question 18 of 32A A 3.0 / 3.0 Points human beings Pointin, the Normal set point for body temperature is A A A 39A A C 4A A b41A A C CA A 40A A C D 37A A C A A E 35A C Feedback : Good job QUESTION 19 OF 32A A 3.0 / 3.0 Points Glucose is stored in the liver and muscles as large polysaccharide called A A glycogen A B sucrose A A C triglycerides A d cellulose A e starch Feedback : Good job question 20 of 32A A 3.0 / 3.0 Points breakdown of complex organic molecules in smaller ones is known as a reduction A A A oxidation A C gluconeogenesis A A A A anabolism A e catabolism Feedback : Good job 21A of 32th A A 3.0 / 3.0 points the transfer of heat from a warmer object to a colder without physical contact A Called A A radiation A b transformation A A A convection A d conduction A e evaporation Feedback : good job 22 to question, A A 3.0 / 3.0 Points Organic nutrients needed in small quantities to maintain growth and normal metabolism are called A A A vitamins A B minerals A C carbohydrites A A A A lipids A e amino acids Feedback : good work! Part 4 of 6 - A A 21.0 / 21.0 Point question 23 of 32A A 3.0 / 3.0 Points patient has a fasting glucose test value of 126 mg/dl. This indicates that the patient has A A A normal glucose tolerance A B prediabetes A C type 1 diabetes mellitus A D type 2 diabetes mellitus A E multiple myeloma Feedback : Good work question 24 of 32A A 3.0 / 3.0 Points Glucose is stored in the human body such as A A A A glucagon B insulin A A C glycogen A d plant Starch Feedback : Proper demand 25 of 32A A 3.0 / 3.0 Points Glucose remains high in the blood as a result of A A A type 1 diabetes mellitus A B type 1 and type 2 diabetes mellitus A C systemic 2 diabetes mellitus A d diabetes insipidus A e type diabetes mellitus 1 and diabetes insipidus Feedback : Proper demand 26 of 32A A 3.0 / 3.0 Points This simulation, the optical density is measured using a A A A A caliper B microscope A A C spectrophotometer, d THERMOCYCLER Feedback : correct query 27 of 32A A A glucose 3.0 / 3.0 point can be found in urine A A A as a result of type 1 diabetes A B as a result of type 2 diabetes A C When transportation maximum for resorption at the level of renal tubules is exceeded A D All del Above Feedback : Correct question 28 of 32A A A 3.0 / 3.0 Points patient has a fasting glucose test (FPG) for three consecutive days and the following results are obtained: 82, 108, and 96 mg / dl. How do you interpret these results? values A A These are values normal A A b These indicate the absorption of glucose altered by values cells A A c These indicate diabetes mellitus Feedback : Correct question 29 of 32A A A 3.0 / 3.0 Points patient has a fasting glucose plasma (FPG) test three subsequent days and the following results are obtained: 136, 130, and 128 mg / dl. How do you interpret these results? Values A A These are values normal A A b These indicate altered absorption of glucose from values Cells A A c These indicate diabetes mellitus A d Determine if type 1 or type 2 diabetes mellitus Feedback : Correct answer of 6 - A A 8.0 / 8.0 Points Answer the following question with words without using any resource. The answer should be written in 10 phrases that use proper grammar, spelling and punctuation. question 30 of 32A A 3.0 / 3.0 Points Explain the difference between type 1 and type 2 Diabetes mellitus. Type 1 diabetes mellitus is an autoimmune disease where the immune system attacks the beta cells of the pancreas which produces insulin. Type 2 diabetes mellitus is characterized by insulin resistance and relative deficiency of insulin. In contrast to type 1 and type 2 Diabetes mellitus, please review the laboratory exercise 4, activity 2 comment: correct! Question 31 of 32A A A 4.0 / 4.0 points explains how excess glucose is removed from the body. Excess glucose is filterd from the kidneys and passed through urine Feedback : Learning Objective: Describe how the human body expels excess glucose. Please review the laboratory exercise 4, activity 2 comment: correct!
