The national bibliographic control is one of the purposes of a national library. To acquire material as quickly as possible to maintain a high level of precision in all work procedures to maintain simple work processes to achieve the highest possible unitary cost to develop close and friendly work relationships with Other library units and suppliers in general are five steps taken to acquire material for a library collection, whether physical or digital. Leases: Contracts that allow access to particular resources for a period of time. And Margaret Zarnósky saponaro. "RDES OF THE MANTA: largely a combination of a firm order and an approval plan. The orders of the blanket are the library that is committed to buying everything. Again, the institutions that generally have a process for this type of acquisition are academic libraries or more large research. Now, for large libraries with large collections, as well as sufficient budgets, the procurement functions are carried out through a separate unit known as Acquisition Unit or Department of Acquisitions. First, the material selections are made according to the policy of development of the library compilation. For example, a library makes a contract with a certain publisher or provider and will buy everything this publisher or provider has available regarding a topic. Acquisitions are the first function of the technical services of the library (two other functions that are being the management of cataloging and collections). Unlimited libraries; Oxford, England. Some libraries do this through the mandatory laws or legal deposit, in which publishers are legally obliged to present copies of copyright materials to the National, sometimes, even if they do not intend to publish work.

Subscriptions: Generally they are used for journals, newspapers or other serials that a library will acquire. The development policy of the library collection generally establishes if the library accepts gifts. A benefit benefit This style of order is that the acquisition department can sometimes make better decisions with the materials in hand in front of an order form. Acquisitions In an academic library In the great academic libraries, procurement units are often organized by the types of materials that are ordained, generally breaking into units of monographs, serials or periodic publication units, and They still subdivided by the country or region of the world where the materials are requested from origin and can be obtained from the library if the library collects in a large number of languages. For example, a specific book, textbook or daily that the library wants. Recovered from " Keywords: Fountains, Mét, Acquisition, Library, Library Resource Acquisitions or Library Acquisitions is the Process of selecting and acquiring selected materials for library and information centers in all formats, including digital articles and maintaining the necessary records related to acquisitions. Libraries and Series of Text of Information Science. Association for collections of libraries and technical services (ALCTS). The Department can select suppliers, negotiate consortium prices, organize permanent orders and select tutors or individual resources. [1] Libraries, both physical and digital, generally have four common common objectives that help dictate these responsibilities. Leases are the most commonly used with electronic resources such as databases, magazines and materials based à 6
