”مجھے تھوڑی دیر مزید سونا چاہیئے تھا،“ اس نے سوچا۔ اُس نے آج رات پھر

بچھلے ہفتہ والا خواب دیکھا تھا، اور اب پھر، خواب مکمل ہونے سے پہلے ہی اس کی آنکھ کھل گئی تھی۔

وہ اٹھا اور پہلے تو شراب کی کچھ چسکیاں لیں، پھر اس نے اپنا عصا اٹھا کر ان بھیڑوں کو جگانا شروع کر دیا جو ابھی تک سو رہی تھیں۔ وہ یہ مشاہدہ کر چکا تھا کہ اس کی زیادہ تر بھیڑیں اسی وقت جاگ اٹھتی تھیں جس وقت وہ بیدار ہوتا تھا۔ ایسے معلوم ہوتا تھا کہ جیسے کسی پر اسرار قوت نے اس کی زندگی ان بھیڑوں کی زندگی کے ساتھ منسلک کر دی ہو، جو پچھلے دو سال سے اس کے ہمراہ ملک کے گوشہ گوشہ میں، آب و دانہ کی تلاش میں گھومتی پھر رہی تھیں۔ ”یہ تو مجھ سے اتنی زیادہ مانوس ہو چکی ہیں کہ یہ میرے پورے نظام الاوقات سے واقف ہیں،“ وہ دبی زبان میں بڑبڑایا۔ پھر، ایک لمحہ غور کرنے کے بعد، اس نے سوچا کہ یہ اس کے بالکل برعکس بھی تو ہو سکتا ہے: اصل میں وہ خود ہی جانوروں کے نظام الاوقات کا عادی ہو چکا تھا۔

تاہم کچھ بھیڑیں ایسی بھی تھیں جو جاگنے میں کچھ زیادہ وقت لگاتی تھیں۔ اس نے ان کو باری باری، انکا نام لیکر، اپنے عصا سے جگایا۔ اسے ہمیشہ سے اس بات پر یقین تھا کہ بھیڑیں اس کی ہر بات کو سمجھنے کی صلاحیت رکھتی ہیں۔ اس لئے کبھی کبھار وہ انہیں کتابوں کے وہ حصے سناتا جن سے وہ پڑھتے وقت متاثر ہوا تھا، یا سبزہ زاروں میں اپنی تنہائی دور کرنے، یا زندگی کی خوشیوں کے بارے میں باتیں کرتا تھا، اور ان نئی چیزوں پر تبصرہ کرتا جنہیں وہ ان شہروں میں دیکھتا جہاں سے وہ عام طور پر گزرتا تھا۔

لیکن گزشتہ دو دنوں سے، وہ ان سے صرف ایک ہی موضوع پر گفتگو کر رہا تھا:

ایک نوجوان لڑکی کے بارے میں جو کہ اس شہر میں رہتی تھی جہاں وہ اگلے چار دنوں تک پہنچنے والا تھا۔ یہ ایک تاجر کی بیٹی تھی۔ وہ وہاں پچھلے برس ایک مرتبہ گیا تھا۔ تاجر

The alchemist code beginner guide 2020.

Much ado about Levels and Stars
In this game every unit has a few "levels" that you can upgrade, they are Lv, Job Lv, Rarity and Limit breaks.Lv This is what level the unit is currently at, it is limited by the rarity of the unit or your Account rank/ level , whichever is lower. For example, disassembling a curious doll will get me 20 curious doll shards. These skills are red in colour.-Support skillsThese skills are, as the name suggest, skills that activate continuously/ passively. Its fairly simple so I don't think I need to talk to much on it. So the maximum amount of times a unit can be evolved (increase its number of stars) is shown on the unit's page, next to its name, the gold coloured stars shows how many stars it has and the hollowed out stars shows how many stars it can gain. As for elemental and rainbow soul shards, elemental shards are soul shards that you can use on any character of that element, mostly people use these shards on limited/ collab units. You can increase the level of a unit by gaining experience from doing quest or by feeding them apples by clicking on the "Enhance Unit" button in the unit's page.Job Lv Job level is what level is the job of your character at, if you've played Ragnarok Online, Bravely Default, or Final Fantasy Tactics, this should be easy for you to grasp. For example, when I upgrade "Marksman" (Gunner's job ability) to level 2 I will unlock "Leg Shot" for that character.Ability SetupWhen you click on ability setup on a unit's page, you will be able to customise what skills you want your units to have, you can have a Dark Cavalier Anastasia with support skills from her Dark Knight and Crafter job, with a reaction skill from her Dark Cavalier job and the Basic skill of her Crafter job.General Tips and stuffa base 5 star unit will not necessary be better than a 4 star base unit, for example, Zahar, a 5 star base unit, is much worse than Lucian or Zangetsu, both 4 star base units.If you are not a whale, try not summon excessively, only summon the 3 step 500 gem step every 2 weeks and the 300 Gems 3 step gear summon. So first off, it's entirely possible for a 1 star unit to become a 5 star unit, if you've played Brave Frontier, Final Fantasy Brave Exvius, Valkyrie Crusade, you are probably familiar with this concept. To up a unit's job level, you'll need to fill up the 6 equipment slots on the right side of the screen. They are green in colour.-Reactive skillsThese skills are like counters, they either make your character hit back after getting hit or something similar. To evolve a gear, you need to max out the level of the gear and have sufficient number of gear shards for that piece of gear you're evolving.-Getting gear shards You can get gear shards by using the gear shard ticket or buying it from the shops, you can also get gear shards by disassembling a piece of gear to get gear shards for that gear. Playing the game is pretty straight forward, so I'll be explaining some mechanics that some people might not be used to. As your job level goes higher, you'll unlock more abilities for that respective job, to see what level an ability unlocks at, just click and hold on the ability you're interested in. After you click on the "Job Lv Up!" button, all the equipment on the 6 slots will disappear, and your unit will retain all the benefits from the 6 consumed equipment, and another cycle begins.Rarity A.k.a the number of stars the unit has. You might be thinking, "How do I get soul Shards?" You can get them in a few ways:-Getting a dupe of a unit When you get a dupe of a unit in the summon, you'll receive soul shards for that unit instead, and as it is to be expected, units of different rarity gives a different amount of soul shard. And as with Basic skills, you can have them equipped while playing a different job. As for the unit's personal level cap, it depends on the stars the unit has, 1 star units will max out at level 10, 2 stars at level 20, 3 stars at level 30, 4 stars at level 50 and 5 stars at level 60. So if you evolve a unit from 3 stars to 4 stars, it's max level will increase from 30 to 50. I should also mention that gear equipped for each job on a unit is exclusive to each other, which means to say that if I have Cloak of Protection equipped on my Holy Knight Logi, his Soldier form won't get the benefits, I'll have to un-equip it from his HK form and re-equip it to is soldier form.-Improving gear Like with units and apples, you can improve a gear by using ores on it. There are also some gear that can only be equipped by certain jobs, for example, Lethal Slinger can only be equipped by Snipers. There will also be universal gear shards in the future, so personally I wouldn't recommend disassembling your 5 of your 4 star gears just to evolve 1, unless your wallet runs deep, then yeah, you do you.Jobs and abilitiesJobs As mentioned in the limit break section, limit breaking the fifth and 15th time will allow you to unlock the second and third job for that unit.Unlocking a job For you whales or lucky people out there that got a dupe of Yomi, and limit broke her 5 times, might be thinking, "Why can't I change her job to Ninja?" Well my giant mammal friend, that's because you need job tokens. You'll need to do gear summons from the summon tab to get gear. They are purple in colour and can be equipped to any job like support and basic skills.-Master AbilityThough technically not a type of skill, they are really different from the other 4 and deserves their own section. If you're using apple, then yeah, you'll have to delete the app and re-download everything.Edit: I was told the phone doesn't have to be rooted to delete the .dat file, so yeah just check if your phone can do itWho should I reroll for? If you have a rooted andriod and/or an emulator like Nox or Memu you can go to scdcard/android/data/sg.gumi.alchemistw/files and delete the qu3c.dat file, and you can reroll by playing through the tutorial again without needing to re-download all the assets. So for characters like Rin, a 1 star base, is able to reach 5 stars, while characters like Celine, a 4 star base, will not be able to reach 5 stars. When you click on the new job, you'll see that there are 6 empty slots on the right hand side, you'll see that you'll need 6 ninja tokens to fully fill all 6 slots. 3 stars give 15 soul shards, 4 stars gives 20 and 5 stars give 25.-Farming them from events Like the Mianne soul shard event, you can clear the quest an unlimited amount of time to get as many shards you want for that character.-Farming hard quest Certain story quest have a hard mode which can be cleared 3 times a day, and these quest will drop a soul shard for a certain character, all units except for collab and limited units will have a hard quest where you can farm their soul shards. The job level cap is decided by the number of stars the character currently has, 2 stars will have a cap of job level 3, 3 stars job level 6, 4 stars job level 9 and 5 stars job level 11. Another way to increase its max level is by limit breaking, which I will go into later. But just in case any of you all are confused: fill slot, up level.-Upgrading your equipment You can upgrade or as the game calls it "enhance" your equipment using Alchemy pots, but there's really no real reason to do so until you have maxed out that unit's job level as the equipment will be lost once you up your job level.-Gear Gear are the stuff that you can equip on your unit on demand, click on a unit in the unit tab and check the top right corner to see how many gear your unit can equip, and like units, you can evolve them to increase their stars. What I mean by this is that, assuming I have unlocked the needed job, I can have Dark Knight Dias use skills under "Basic War arts". You can customise what basic skills you want if you don't like them. These skills are red in colour with a lock next to it.-Basic SkillsThese skills are skills that can be used even in other jobs, like "Basic War arts", "Basic Ninjutsu", "Basic Dark Sword". So take advantage of it.Don't be an ass in multiplayer.Most importantly have fun, if you like a unit, just use it, no point having all the biggest baddest units if you don't like them, if you like waifu units, just use them yo, the main point of a game is to have fun.Let me know what else you all might wanna know or if this guide was bad/ good or has wrong information yeah!Page 2 56 comments To increase the star of the unit, you'll need to evolve the unit, to do so, you need to get the units to the needed level,-Level 10 for 1 star -Level 20 for 2 stars -Level 30 for 3 stars -Level 50 for 4 stars After they have reached the required levels, click on the evolve button, and you'll see the materials needed to do so, once you get them and the required zeni, you'll be able to evolve them.Limit Breaks When you click on a unit in the unit tab, you'll see a blue box with the words "limit break" on it with star/ petals like symbols, this is the limit break option. There are benefits that you can get from limit breaking a unit, for every limit break you do, the unit gets combo +1 and max level +1, and there are additional benefits for every fifth limit break you do.-Limit break x 5: The unit's second job becomes unlockable-limit break x10 : The unit's second gear slot is unlocked (able to equip 2 gears, refer to gear section)-limit break x15: The unit's third job becomes unlockable-limit break x20: The unit's character quest becomes unlocked, allowing you to get its master ability-limit break x25: The unit's third gear slot is unlockedNow you might be thinking, "I can only limit break 20 times on my Lofia (a 4 star base unit), am I doomed to have the cutest character in the game only have 2 gear slots unlocked?" Fear not my friend of good taste, if you evolve Lofia into a 5 star unit, she'll get an additional limit break star, allowing up to 25 times of limit breaking goodness. You'll have to farm the 6 items from Rogue's Trial-Mastery to change her job. You'll see that there are 6 slots on the right side of the character screen, after you fill up all 6 of them with the respective required equipment, you'll be able to upgrade that unit's job level. While rainbow shards are soul shards that can be used on any character, by the time you get them, you should have already have knowledge about them, so I'm gonna skip the elaboration. YeapDon't upgrade your equipment (not gear) until you're at job level 11, or it'll all go to waste.Buy equipment tickets, they have a chance to drop Job Specific Equipment (not gear) that is normally not found in Zeni summons.Multiplay allows you to do quest and farm stuff at either half the energy cost if you host the room, or free if you join the room. Skill points are refill themselves once every 2 minutes, don't ask me why 2 minutes, cause I find it pointless too, I should also mention that the cost of limit breaks increases after every fifth time you do so.Limit breaking the first 5 times will cost 5 soul shards each, totalling to 25 shard, the sixth to tenth time will cost 10 shards each time, totalling to 50 for the second limit break star, 15 shards for 11-15, 20 shards for 16-20 and 25 shards for each of the last 5 times. So on to the main part, the actual limit breaking. You can exchange soul coins for various items like soul shards, gear shards, gold, crafting materials etc.Time for BlingEquipment vs Gear Now if you're anything like my friend, you'll spend all your tickets the moment you touch them. I'm not gonna judge cause whatever floats your boat man, but you'll probably be thinking "Where are all my equipment?" "How do I equip this Dark Sword I just summoned?" You can't.-Equipment Think of Equipment as upgrade materials, you'll need these things to upgrade the job level of your characters, click on your unit page, and choose any unit. You will be able to limit break your character once you collected the required soul shards and or elemental/ rainbow shards. Another example would be I can have a Mianne use Basic Mage skills while she is a Bishop. Needless to say, if you evolve a character from 4 stars to 5 stars, it's job level cap will increase too. You can also get gear shards to transmute into a gear, just like units.-Gear slots As I mentioned in the limit break section, you can unlock more gear slots, up to a maximum of 3 by limit breaking your unit.-Equiping gears I should mention now that there are 3 types of gears: Weapons, as seen from the red sword symbol Armours, which is denoted by the blue shield symbol Accessories, which is shown by the green ring symbol Every unit can only equip one of each type, which means you can't equip 2 swords, or 3 rings etc. So you'll need 375 shards to MLB (Max Limit Break) a unit."Oh no, I have MLB my waifu, what ever will I do with these leftover shards?" Have no fear my dear weeb, you can convert excess shards in to soul coins in the soul exchange shop, just drag your screen right on the main screen and you'll be able to see it. I'll talk about it more in the equipment section. They range from increasing your MDef to improving your attacking range. "But wait CK, what do I know what's good?" To that I'll say, "check the section below."If you are unhappy with your roll you can choose to reroll the game. There's quite a bit to it so I'll try to cover everything.-Getting Gears You cannot get gear from equipment summons. Getting started:RerollingHow to reroll: Your first roll comes after you complete the tutorial and go into the main screen, collect the gems and items from your gift box and you should have at least 500 gems, go to the summon section and do the 3 step summon, which cost 500 gems. These skills are really sick skills that your character can unlock after being limit broken 20 times and clearing their character quest, or via other means for characters like Logi and Dias. The maximum level the job level can reach is 11, in which you'll unlock bonus stats for that unit when that occurs. Yeah, that's about it.-Evolving gear You can increase the stars of a gear by evolving it, by evolving a gear, it may gain additional effects or additional stats. Some abilities start out maxed, like Ninja Stealth (Ninja Support ability).When you click and hold on a red ability, you can see what skills you can unlock as well as what they do. You can always switch between jobs without any penalty, so don't freak out or anything.Abilities Different types of abilitiesThere are 5 types/classes of abilities a unit can have, they are:-The "main" skillThese skills are skills that are locked to the job your character is currently set it, for example: Ninjutsu, Dark Sword, War Arts. For example, If you are Rank 5, all your units cannot exceed level 5. With the units in the pool now , the list here has become more relevant, just check on the portrait and try for units that are S or SS ranked.But don't worry too much about it, cause the story quest isn't that hard, and eventually, with the exception of limited characters, you'll eventually be able to farm all of the units through transmutation of soul shards found in hard stages.Things to do after you're done rolling your account:The beginner shop Under the limited shop tab, there should be a beginners shop that's limited for 7 days, make sure to buy:-All 5x 10 equipment tickets that'll be available every day -All the Forbidden (Rainbow) apples -All the skip ticketsOptional The first aid setActually playing the game: So yeah, after that's out of the way, what's next? They can be Active skills or Support skills etc depending on the unit.Upgradeing abilitiesThe abilities above can be upgrade to gain better effects or more abilities, you can upgrade an ability up to a max level of 20 by paying skill points and zeni. Ideally only summon all 3 steps if it is there are limited units on the banner.Elemental weaknesses are a bit weird in the game.
